

ACCESSORIES

SURGE PROTECTORS

Features:

Protect or Disconnect Circuitry - automatically disconnects the transmitter in case of a rare catastrophic surge or direct lightning strike.

Protects against normal AC power surges and lightning.

Space Saving Design - low profile with better balance and stability.

Power Indicator Light - easy to see that power is on.

Reduces the Risk of System Failure - your pet will continue to be contained.

Better Loop Connectors - easier to attach the loop wires to the unit.

Increased Surge Current Ratings - protector has a larger capacity to dissipate surges.

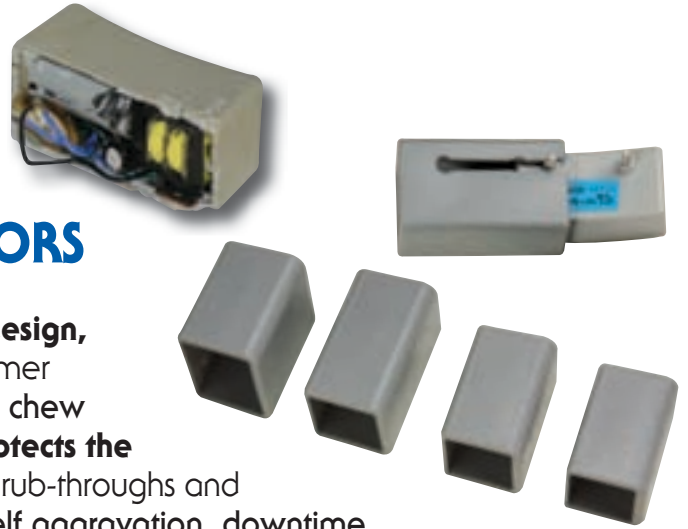

DID WE DO THAT?

NEWEST LINE OF CHEW PROTECTORS

Easy snap on, slide off design, sleeker fit and H.D. Polymer material makes the **NEW** chew protector **tougher** and **protects the receiver** from dog chews, rub-throughs and other damage. Save yourself aggravation, downtime and money by using chew protectors on your receivers.

BATTERIES

Dog Guard Batteries are tack welded and available in 6 volt 357 Silver oxide. This battery is recommend for use in the DG9000, DG9XT, DG5000, DG 3000 receivers. Dog Guard batteries are tack welded cells, that keep the cells from expanding in the receiver. This assures that the cells are constantly in tact with each other.

BUTTON BATTERIES

Button Batteries are available in 6 volt Lithium for the Micro receivers.

Prevent damage to your receivers by using **ONLY** Dog Guard batteries.

Your Dog Guard professional dealer will set you up with the correct battery plan for your equipment.
